

何蘊芳副教授

研究領域:

臨床藥學、藥理學、藥品交互作用、藥事執業、藥學教育學

研究方向:

1. exploring basic mechanisms underlying pharmacological actions and pharmacokinetic interactions of drugs and herbs using in vitro and in vivo systems.
2. probing pharmacy practice-based issues and resolutions, including topics on community services, chronic-illness refills, rare diseases, dispensing qualities, and pharmacoinformatics, through survey and data-mining methodologies.
